DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 12 drawn to a solid-state pulsed laser device, classified in class 372, subclass 25.
 - II. Claims 10-11 and 13, drawn to an optical head using a saturable absorber mirror, classified in class 372, subclass 11.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the optical head as claimed in claim 10 does not require the pulsed laser device as claimed in the subcombination with a solid laser medium. The subcombination has separate utility such as optical transmission (telephone), medical (laser surgery), etc.
